

4.2 Playground versions

Following are the currently available versions of the OpenAI Playground application:

Complete Mode- Parameters Overview

Playground Interface Screen

Key Parameters

Temperature

Controls Response Randomness

Example:

Temp = 0.2 → “Paris is the capital of France.”

Temp = 1.2 → “Paris, known as the City of Lights, is a cultural hub with rich history.”

Maximum Length

Set Response Length In Tokens

Example:

Temp = 0.9 → Picks words from the top 90% of probable choices.

Temp = 0.3 → Only picks from the top 30%, making responses stricter.

Stop Sequence

End Response At A Specific Point

Example:

Stop Sequence = “Thank you.”

Model generates: “The project details are as follows... Thank you.” (and then stops).

Top P

Controls Content Diversity

Example:

Without penalty: “Dogs are loyal. Dogs are friendly.” → **With penalty:** “Dogs are loyal companions and loving pets.”
