

Then, when you submit the query, you will get the following response.

Refused To Answer The Query

ChatGPT refuses help if given a role that limits productivity or career growth.

ChatGPT has now refused to help. Why? Because you had given it the role where it does not want anyone to excel in their careers or be productive. In the OpenAI Playground application, you can provide various such roles to ChatGPT. That is the beauty of the OpenAI Playground application.

Here, you can explore and shape ChatGPT into whatever role and capability you want it to have.
