

4.2.3 Assistants

In the Assistants version, you can build my chat assistant, which will refer to my database instead of ChatGPT's. You will set the bot's name as 'Digital Helper,' the instruction is 'Ask any questions about Digital Marketing,' and the model is gpt-3.5-turbo-1106.

Now, let's load the response to the query, "Can you tell me trends in Digital Marketing 2024?" and press 'Run.'

This is the response:

The helper can only answer based on the uploaded file. Provide the right file for a good response
