

So, the digital helper cannot answer anything outside the scope of the currently uploaded file. If you want a good response to a question, you must give it the correct file. Now, let upload the following file:

Download the correct file and Upload it in the Playground app

This is a report on digital marketing trends in 2024. You will download the file, go to the Playground app, and then upload it.

When the file appears and the 'update time' changes, ChatGPT is trained on it
