Administrators' Fees	938.1	1,546.7	2,550.0	16,878.1

¹Estimated fees are in 1990 dollars.

Additionally, to minimize estate taxes, many affluent parents reduce the size of their estates by transferring much of their wealth to their offspring before death. During the ten-year period 1996-2005, it is forecasted that living parents/grandparents will give their adult children and grandchildren more than \$1 trillion. These gifts will be in various forms, including cash, collectibles, homes, cars, commercial real estate, public securities, and mortgage payments. This \$1 trillion in gifts translates into more than \$600,000 (in constant 1990 dollars) for each child of the affluent. This \$1 trillion figure is a very conservative estimate, since, as stated earlier, by the year 2005, households in America with a net worth of \$1 million or more will account for \$16.3 trillion—or
