With this in mind, we have estimated how many U.S. households will have a net worth of \$1 million or more in the year 2005. We have also estimated how many of these households there will be in each of the fifty states, the District of Columbia, and among Americans living outside the U.S. (see [Table 7-5](#)). Note that California has the largest millionaire household population. In terms of concentration per 100,000 households, however, Connecticut ranks first.
