

And finally, we have Robert, who hails from Hawaii and has two dads—one rich, one poor. “Double-Dad Robert” bellicosely explains the real definition of assets and that sophisticated investors are deep into real estate. On national television, Robert once bragged about his Lamborghini and I found this extravagant exposition ironic, yet disingenuous. Why? Isn’t Robert showcasing the fruit of his teachings? Perhaps.

Robert is a Fastlane success story. He created and built a brand worth millions. But the curious question is this: Which came first? The best-selling book or the Lamborghini? Is there a Paradox of Practice underneath? Did Robert have this status icon “pre-book” by leveraging his real estate teachings? Or did the Lamborghini arrive after selling millions of books? Robert has undoubtedly amassed a great deal of wealth selling books, games, and seminars. Is it possible you’re being sold *one wealth equation* while the architect of the game *uses another*?

Gurus fill a market need and I don’t deny it. However consider this: Are they being truthful about their paradox and their magic potion? Are they rich because of what they preach, or what they sell? Once you’re familiar with Fastlane mathematics, it should become clear to you which gurus are likely guilty of the paradox. Is the underlying mathematical equation which governs their teachings the same one that made them rich? If the “do as I say” doesn’t match the “do as I do”, you should be suspicious.

What makes me different is this: The Fastlane concepts in this book gave me financial independence. I already have financial freedom—the nice house, the sports cars, and the flashy rapper credit card. I don’t need this book to get me these things. I also confess this Fastlane disclaimer: This book has the power to make me wealthier because it leverages the same wealth equation I teach you. In other words, the “do as I say” matches the “do as I do.”

SLOWLANE GURUS ADMIT FAILURE

On a Slowlane financial radio show, a caller sought advice: In a few months the recession destroyed more than 50% of her savings, which had taken her nearly 10 years to accumulate. The Slowlane guru’s advice? A palliative “Stick to the plan.” Recommit. Rebuild.

In other words, my crappy plan has failed you, has taken 11 years to fail you, yet stand by it. Hope the economy rebounds. Hope the economy never sees another recession. Hope, hope, and hope. And yes, please buy my newest book, *Rebuild* . . .

Economic recessions expose the Slowlane as a risky fraud with lifetime ramifications. Since these gurus make their rich livelihood selling the Slowlane roadmap, they need you to believe it works. *Their wealth comes from your belief*. Despite the current recession’s masterful exposé, the Slowlane illuminati will never admit that their strategy is woefully inept, and instead they have deviously recalibrated their
