

low-interest-rate environment I can find safe investment yields in the 4%–6% range, some tax-free. While most people shudder at the thought of an interest rate increase, I love it. I get a pay raise. A 1% interest rate hike translates into thousands per month for me. And since inflation rises in unison with interest rates, my income has an element of inflation protection. If inflation rises, so do interest rates.

So how does all of this become a reality? I created a passive income stream via my Internet businesses (a business money tree seedling), which funded my passive income system from lending. While my Internet business was 85% passive (yes, I had to work several hours per week), my lending passivity is 99.5%. I do virtually nothing and the checks arrive.

Instead of trading my time for dollars, *I invested my time into an autonomous system simultaneously capable of passivity and capable of funding my money system.* It was a dual-flanked attack where passive income was both the short and long term goal.

AMASS YOUR ARMY OF FREEDOM FIGHTERS

Every dollar saved is another freedom fighter in your army. If your money is fighting for you, your time is freed and you break the equation of “time for money.”

Money is your army. The more you have, the more they will fight for freedom. Slowlaners focus on the expense variable in the wealth equation when they should be focused on the income variable. Income is the key to growing your army of freedom fighters. You aren’t going to recruit a massive army detailing cars down at the Jimmy’s Auto Salon.

And I’m not referring to just the U.S. dollar, but all international dollar-denominated assets. As I write this, much of my income is derived from non-U.S.-dollar assets in other countries with stronger currencies and better yields. Fastlaners think globally, not locally.

What does a dollar represent to you? A mechanism that gets you bottle service at the club every Friday? Or is it the seed of your money tree? Is it your freedom fighter? Make money fight for you instead of you fighting for money.

HOW FASTLANERS (THE RICH) USE COMPOUND INTEREST

While examining the Slowlane, I impugned “compound interest” as an impotent wealth accelerator because of its attachment to time. When the Slowlane media darlings read that assertion I’ll be crucified because lambasting compound interest is the pinnacle of financial blasphemy. But I also exclaimed it to be a powerful passive income generator when leveraged against large sums of money. Contradictory? Just like education, Fastlaners and Slowlaners leverage compound interest differently. Slowlaners (the middle-class) use compound interest to get wealthy while Fastlaners (the rich) use it to create income and liquidity. Slowlaners start with \$5; Fastlaners start with \$5 million.
