

Weighted Average Decision Matrix (WADM)

Factors	Detroit	Phoenix
Weather (10)	2 [20]	8 [80]
Schools (3)	2 [6]	3 [9]
Cost of Living (6)	5 [30]	7 [42]
Business Climate (2)	6 [12]	4 [8]
Taxes (7)	6 [42]	7 [49]
Safety (4)	3 [12]	6 [24]
Entertainment (8)	5 [40]	2 [16]
Near Family (7)	10 [70]	0 [0]

The final step is simply to add up the graded weight columns to get a final number for each choice. The highest number will be the choice you favor. Your final WADM would look like this:

Weighted Average Decision Matrix (WADM)

Factors	Detroit	Phoenix
Weather (10)	2 [20]	8 [80]
Schools (3)	2 [6]	3 [9]
Cost of Living (6)	5 [30]	7 [42]
Business Climate (2)	6 [12]	4 [8]
Taxes (7)	6 [42]	7 [49]
Safety (4)	3 [12]	6 [24]
Entertainment (8)	5 [40]	2 [16]
Near Family (7)	10 [70]	0 [0]
	<u>232</u>	<u>228</u>

The better choice
