

Deodorize Flatulent Headwinds

Ridicule is the tribute paid to the genius by the mediocrities.

~ OSCAR WILDE

THE FASTLANE'S NATURAL HEADWIND

The greatest invention of mankind was the airplane because it defied the natural force of gravity and seemingly violated the laws of physics. How could something so heavy float in the air? What made Orville and Wilbur Wright's achievement so spectacular wasn't just the act of flying, but the act of breaking free from society's gravitational pull.

"Flying is impossible."

"You guys are nuts."

"You are wasting your time."

"Foolish . . ."

Before they could even pursue flying, the Wright brothers had to break free of society's natural headwind—the natural social conditioning that impregnates all young minds. A Fastlane Forum member posted this:

Go into a kindergarten class and ask the kids how many of them can sing. EVERY hand will go up. Fast-forward 13 years and ask the same class of seniors the same question. Only a few hands will go up. What changed? The kindergarten kids believed they could sing because no one had told them otherwise.
