

Jim Gallagher graduated 11 years ago and is unemployed. Jim is a stock-broker, but because of Internet technology his expertise has become endangered and flirts with extinction. Jim's education for that specific job-set has become dated and no longer applies to the current world. The world has moved on, yet Jim and his education have not. Jim contemptuously takes a menial sales job at a local furniture store. His financial plan stalls because he operates with the same stale oil last changed 11 years ago. Jim fails to change his oil so Jim's road trip to wealth also fails.

Education, your oil, is a critical component to your wealth road trip. When you continually inject yourself with new education, new skills, and new competencies, new roads open and things run smoothly. The right education has incredible horsepower.

EDUCATION'S ROLE

Education is virtuous under both Slowlane and Fastlane roadmaps, but their roles are profoundly different. In the Slowlane, education is used to elevate intrinsic value, while in the Fastlane it is used to *facilitate and grow the business system*. Also, Fastlane education is secured by methods that do not produce parasitic debt or conformity. The purpose of education within the Fastlane is to amplify the power of the money tree and the business system. You're not a cog in the wheel; *you learn to build the wheel*.

For example, if I go to a training seminar that gives me skills to "hire top-gun sales people," I'm engaged in activities that specifically enhance the fertility of my business and my money tree. If I read a book on a new computer technology that illustrates how to create new interactive Web site features, I'd be learning to facilitate the system. Again, Fastlane education is to foster growth of the business system. Conversely, Slowlane education is designed to specifically enhance the intrinsic value of the person receiving the education. It is to become a gear in the system.

A Fastlane Forum user had an opportunity to pursue an MBA and he asked if it was worth it. My answer typically would be no, but this scenario was different. First, the MBA had no money cost, only time cost, as the government was paying for it. Second, this gentleman espoused the Fastlane ideology so his purpose was not intrinsic value elevation, but expansion of his knowledge to facilitate a Fastlane system. I voted yes.

"I DON'T KNOW HOW!"

If an oil change puts your car on a lift for months or years, what's the point? Your continued education must not come laden with conformity or parasitic debt, but must facilitate your Fastlane system. How? Make the real world your university. Yes, *you are your own university*.
