

The last two words of the quote are “other people.” You want to be damn sure you aren’t “other people,” because “other people” is synonymous with “most people.” Most people are consumers who are two paychecks from broke. Most people won’t invest long hours into their business system while friends are living it up on credit. Most people will allow friends and family to deflate their dreams with “that won’t work” directives. Most people start excited and gush with exuberance but give up at the first pothole or failure. Most people succumb to “I quit” and give up not knowing that they are one or two plays away from a touchdown—the Fastlane exponential growth curve.

“Are we there yet?” Wealth is a devious entity, and its elusiveness weeds out the weak. Your journey will follow a predictable path of excitement, questioning, commitment, and rebirth. Fastlane success requires an investment toll of time and effort. This is the toll that makes you special and keeps everyone else out.

This Redlined effort cannot be bypassed nor outsourced. Prime your expectations for work and sacrifice, know your destination, envision your dreams, ready your means, and know that you are simply paying the toll because you don’t want to trade 5-for-2 for life! If you don’t do the hard work that Fastlane opportunity demands, someone else will. And if you aren’t like everyone, you will discover something miraculous: *You can live unlike everyone.*

GET YOUR FOOT OFF THE BRAKES!

The sweat of success is failure, and I am soaking wet.

If you’ve taken a step, spin, or aerobics class, you know the objectives: to sweat, to get your heart rate up, to build cardiovascular endurance, and to lose weight. If you went to a cardio class and the instructor forbade sweating, it would negate its purpose. Hard work naturally produces sweat, and sweat becomes evidence of your effort.

Unfortunately, this ludicrous analogy is the paradox you face if you fear failure and refuse to release the brakes. The sweat of success is failure. While you can’t build cardiovascular endurance without sweating, you can’t experience success without failure. Failure is simply a natural response to success. If you avoid failure you will also avoid success.

You can’t drive the road to wealth with the brakes engaged. You have to take risks. You have to get uncomfortable. You have to get out there and fail.

What causes this fear of failure? Fear of failure is attributed to an overestimated worst-case consequence analysis. What is the absolute worst that could happen and the probability of it happening? You fail at business and have to go back to work? Big deal. When you resist societal headwinds, you will sweat!

Take calculated risks. Do so and things happen. You meet new people. New opportunities arise. Feedback pours in. “Lucky breaks” converge into your life. The act of doing does marvelous things. Yes, the Fastlane is a risk. Failure is
