

providers. However, many small local stores have expanded and created scale with the e-commerce model. In my backyard, I have 24 solar lights that I bought online from a small retailer in Minnesota that operates an e-commerce store. Just years ago, that store was local with no scale—now with an e-commerce presence, they are worldwide and are selling products to retired farts in Phoenix.

E-commerce also can be information. E-books are the most popular form of information distribution on the Internet. When I sell my book in e-book form on the Internet, I'm engaged in e-commerce. I can sell books out of my trunk by sitting in the parking lot at Arizona State University, or I can set up a Web site and sell books to folks in Europe.

When you look at the Internet as a Fastlane road, it is immensely powerful when examined against our Fastlane Wealth Equation.

$$\textit{Wealth} = \textit{Net Profit} + \textit{Asset Value}$$

Within the units sold variable (within net income), the world becomes your upper limit when dealing on the Internet. Additionally, asset value, a component of the Fastlane wealth equation, is not only determined by net income, but by traffic metrics. Many Web sites are sold for billions and don't have a penny of profit. Traffic, or visitors to a Web site, also has a boundless upside scale. The Fastlane variables of net profit and asset value have a virtually limitless upside.

Potent Fastlane #2: Innovation

Innovation is another broad stroke of Fastlane purity and encompasses many roads. It is the good old-fashioned way to get rich: Invent a product, service, or piece of information, manufacture it, and then distribute it.

Innovation covers any act of creation followed by distribution. Let me repeat that: Innovation involves two acts: 1) Manufacture and 2) Distribution.

Invent a product, then sell it by infomercial, sell it on the Internet, sell it on QVC, sell through 10,000 network marketing distributors, or sell it to 20 wholesalers that then sell it to 20,000 retailers. What is the product of innovation? Virtually anything that solves a need or fulfills a desire.

- Food (beer, barbecue sauce, cookies, secret recipes)
- Household (robots that vacuum, tools, hangers)
- Health and vitality (vitamins, herbs, energy drinks, bars, "male enhancement formulas")
- Information (books, magazines, subscription newsletters)
- Personal (clothing, purses, shoes, gloves)
- Automotive (accessories, add-ons, stick-ons)
