

equation and get near the Law of Effect, I have to strap on my commitment helmet and get this product out in front of millions.

Potent Fastlane #3: Intentional Iteration (II)

The final Fastlane Interstate is “Intentional Iteration” (II). Iteration is: “the means or act of repeating a process, usually with the aim of approaching a desired goal or target or result.”

Intentional iteration is a potent Fastlane but it offers the greatest challenge because it really doesn’t satisfy all five commandments, but four. The process of intentional iteration is the act of satisfying the final commandment, scale. Scale is achieved either through human resource systems or repeated successes.

For example, when a real estate investor buys a single-family home at a bank auction and later rents it out, there is no scale, and with that one act, nothing can create scale. The investor has little wiggle room in his Fastlane wealth equation: Net income is derived from rent and asset value is derived by the home’s market value.

To solve that challenge, the investor engages in II and repeats the process. Instead of buying one home, he buys 50. Yes, easier said than done, and it can be incredibly slow. In effect, the investor has chosen to play on a field of “singles,” and to hit the home run, II needs to become the strategy. Iteration is a profitable, singles-based business scaled to home runs.

Franchising is another example of II.

If you build a small store with the goal of intentional iteration, your goal isn’t one store, but hundreds, perhaps thousands, through the act of chaining or franchising. The intentional iterator goes into business to cookie-cut his system across many successes. A small store often starts out as a violation of four commandments but can quickly transfigure into a full-fledged Fastlane venture with iteration. The Fastlane franchising premise is to build a local business defined by systematic processes, then franchise the concept nationally or worldwide. The iterator’s goal is to replicate and sell a concept, a brand, and a system and remove himself from operations. While your little deli might not be particularly Fastlane it could be turned Fastlane by the process of II, through franchise or chaining replication.

A popular thread at my forum is titled “Is a candy kiosk Fastlane?” A forum user wanted to know if having automated candy kiosks in the mall constitutes a Fastlane plan. As a standalone, no. But with II? Fastlane baby! One kiosk in one mall isn’t going to make you rich because it’s a singles-based business. However, 200 kiosks in 50 malls might, because it creates net income, scales asset value, and makes a bigger impact of magnitude. Intentional iteration is the Fastlaner’s response to limited scale.
