

who copied my idea didn't possess a powerful king to the wealth game, and that is execution. Chess isn't won by stealing pawns.

How did MySpace and Facebook become two of the most popular social networks when they weren't the owners of the original idea? Execution. *Execution is taking the neurological flatulence that is an idea and making it smell like a rose.*

Seriously, think about what I've been saying throughout this whole book: Why is execution so difficult, while ideas are so routine? Once again, we return to our wealth dichotomy: Event versus process. Execution takes process: effort, sacrifice, discipline, and persistence. Ideas are just events.

If you need to travel 6 million miles and you move at 15 mph, you will get there in 45 years. This represents the Slowlane. If you move at 95 mph, you get there in seven years. This is the Fastlane. The business of speed is execution. The speed of the Fastlane is growing a business exponentially and taking advantage of exploding net income and asset value.

CHAPTER SUMMARY: FASTLANE DISTINCTIONS

- Speed is the transformation of ideas to execution.
- Most people let powerful information expire and become worthless.
- Successful Fastlane businesses are run multi-dimensionally, like a game of chess. One-dimensional businesses focus on price only.
- Execution divides winners and losers from their ideas.
- In business, execution is process. Ideas are events.
- Ideas are potential speed. Execution is actual speed.
- Others share your blockbuster idea. He who thinks the idea owns nothing. He who executes the idea owns everything.
- Real money and momentum is created when an idea (potential speed) is matched with execution (accelerator pressure).
- An idea is neurological flatulence. Execution makes it smell like a rose.
