

SLOWLANE WEAPONS

- Go to school
- Get good grades
- Graduate
- Pay yourself first
- Overtime
- Corporate ladder
- Save X% of your paycheck
- Contribute to your 401K
- Invest in mutual funds
- Buy and hold
- Paychecks, pensions, benefits
- Diversify
- Raise your insurance deductibles
- The stock market
- Say “no” to expensive lattes
- Be frugal
- Get out of debt
- Clip coupons
- Cancel your credit cards
- Dollar cost averaging
- Get an advanced degree
- Pay off your house early
- Your home is an asset
- Individual retirement accounts (IRAs)
- Live below your means
- Understand compound interest

When you encounter these “buzz phrases,” be wary—someone is selling you the Slowlane as a total plan to wealth. While coupons and other Slowlane strategies aren’t worthless *in* a plan, they shouldn’t be *the* plan. *The Slowlane as a total plan is the problem, not the Slowlane being a part of a plan.* This distinction is critical because financial discipline must transcend to any wealth campaign.

THE SLOWLANE ROADMAP: A MATHEMATICAL INTRODUCTION

How is wealth created in the Slowlane? To expose its method (and its weakness) you need to reverse engineer and deconstruct the strategy down to its mathematical roots, or its wealth equation. In other words, you want to expose the plan’s theoretical speed limits for wealth, which is always determined by two variables: your primary income source (a job) and your wealth acceleration vehicle (market investments). These two variables formulate the Slowlane’s wealth equation and governs its wealth creation power or, in this case, futility.

Wealth = (Primary Income Source: Job) + (Wealth Accelerator: Market Investments)

This equation factored looks like this:

$$\text{Wealth} = \text{Intrinsic Value} + \text{Compound Interest}$$

The primary income variable, *intrinsic value* has two variables itself dependent on how you are paid within your job. It could be either:
