

GOAL (Recurring less frequently)	Priority	Current Cost	Starting Year	Frequency (Every how many years)	Ending Year	Inflation
Buying a car	Stability	15,00,000	2025	4	2065	4%

Source: Ambit Financial Planning Tool

Apart from the goals, the tool also has a placeholder for any future inflow or outflow. For example, it allows for future rental income from a house that Mr Kumar will buy in 2030. Thus the model shows rental income starting from 2030.

Income from Goals Achieved	Income	Starting Year	Ending Year	Growth
Rent from second house	6,00,000	2030	2050	5%

Source: Ambit Financial Planning Tool

Output:

Based on the inputs provided by Mr Kumar, the Ambit Financial Planning Tool calculates all future cash flows for him. The tool then calculates the required rate of return that his investments need to generate to ensure that he has enough capital to meet all his goals. In this case, the required rate of return for Mr Kumar to achieve all his goals is 13.3 per cent post tax. A
