

Exhibit 108: Summary of the seventh iteration

2006–16*	All-cap CCP	Large-cap CCP	Sensex
CAGR returns	20.4%	17.1%	11.4%
Maximum drawdown**	-52.3%	-40.5%	-60.3%
Excess returns***	0.24	0.23	0.06

Source: Bloomberg, Ambit Capital

Note: *Portfolio kicks off on 1 July 2006.

***Excess returns have been calculated as returns in excess of risk-free rate (assumed to be 8 per cent) divided by absolute maximum drawdown. Maximum drawdown is defined as the maximum drop in cumulative returns from the highest peak to the lowest subsequent trough.

**Maximum drawdown from Jan'08 to Nov'09 for the all-cap CCP, Jan'08 to Nov'08 for the large-cap CCP and Jan'08 to Mar'09 for the Sensex.

Mid-cap/small-cap stocks again outperformed in this period with Havells and Suprajit Engineering's stock prices rising by eleven and seven times respectively.
