Note: *Portfolio kicks off on 1 July 2007.

***Excess returns have been calculated as returns in excess of risk-free rate (assumed to be 8 per cent) divided by absolute maximum drawdown. Maximum drawdown is defined as the maximum drop in cumulative returns from the highest peak to the lowest subsequent trough.

**Maximum drawdown from Jan'08 to Mar'09 for the all-cap CCP, Jan'08 to Mar'09 for the large-cap CCP and Jan'08 to Mar'09 for the Sensex.

In this iteration, large-caps led the charge with Asian Paints being the star performer with a jump in stock price of almost fifteen times. Extreme movements were seen in mid-cap stocks again with stocks like Suprajit Engineering rising almost twenty-five times whereas Aftek lost 97 per cent of its value before suspension in May 2015.
