

The ninth iteration of the CCP that began life in July 2008 has so far 'outperformed' the Sensex with an alpha of 10 per cent. The large-cap version also beat the Sensex with an alpha of 7.1 per cent. The large-cap version, on account of lower drawdown, saw a risk-adjusted return of 0.25 times as compared to 0.26 times for the all-cap version and 0.01 times for the Sensex.
