Shaded cell: Stock delivering **positive** return when Sensex gave **negative** return

Bordered cell: Stock delivering **negative** return when Sensex gave **positive** return

So why does the Coffee Can philosophy outperform the broader market even during periods of market stress?

As highlighted in [Chapter 2](#), the Coffee Can philosophy seeks firms which can deliver healthy and consistent revenue growth and ROCE over long periods of time. This implies that even when the broader macroeconomic environment or the competitive landscape becomes difficult for a CCP company, the firm is able to deliver healthy revenue growth and ROCE.
