

MONEY RULES GRID: 20 YEARS FROM NOW

	SHORT TERM	LONG TERM
Accumulation		
Spending		

This is beautiful. You should see clear differences among these boxes. As you become more financially confident and successful, *of course* your Rules will change. They should.

Here's how you know your Money Rules are on the right track:

1. The rules are instantly recognizable as *your* rules. If you showed them to someone, they'd be able to sense it was your list. (For example, my rule about "appetizers" is uniquely mine.)
2. You can look at your rules and apply them to something you've spent money on in the last six months. The more applicable these rules are, the more valuable they are.
3. When you look at your rules, you should feel excited, not restricted.

These three grids represent your path for the future. As time goes on, you'll be able to look back and reflect on what you *thought* your Money Rules would be—and what they have actually become.
