

*Over the long run, money can either be gained or lost.*

*Let's say an investment in a Mutual Fund unit during the dotcom and tech boom.*

*Say it began with INR1,000 and kept investing INR1,000 every month. This would be the result:*

*Investment period*

*Mar 2000 ? Mar 2005*

*Monthly investment*

*INR 1,000*

*Total amount invested*

*INR 61,000*
