

West Texas Intermediate (WTI) crude oil is of very high quality. Its API gravity is 39.6 degrees (making it a "light" crude oil), and it contains only about 0.24 percent of sulphur (making a "sweet" crude oil). WTI is generally priced at about a \$2-4 per-barrel premium to OPEC Basket price and about \$1-2 per barrel premium to Brent, although on a daily basis the pricing relationships between these can vary greatly.

Brent Crude Oil stands as a benchmark for Europe.

India is very much reliant on oil from the Middle East (High Sulphur). The OPEC has identified China & India as their main buyers of oil in Asia for several years to come.

Crude Oil Units (average gravity)

1 US barrel = 42 US gallons.

1 US barrel = 158.98 litres.

1 tonne = 7.33 barrels .

1 short ton = 6.65 barrels .
