

explains 'Revenue'

Revenue is the amount of money that is brought into a company by its business activities. In the case of government, revenue is the money received from taxation, fees, fines, inter-governmental grants or transfers, securities sales, mineral rights and resource rights, as well as any sales that are made.

EBIT

As its name suggests, it is created by considering a company's earnings before interest payments, tax, depreciation, and amortization are subtracted for any final accounting of its income and expenses. The EBITDA of a company gives an indication of the current operational profitability of the business, i.e. how much profit does it make with its present assets and its operations on the products it produces and sells. see the table balance sheet study

Net profit

The net profit is the total profit of the company after all the expenses , tax, depreciation, in a pre define time.
