

private Indian companies in the oil sector such as Reliance Industries Limited (RIL) which operates the world's largest oil refining complex.

As of December 2011, India had an installed power generation capacity of 185.5 Giga Watts (GW), of which thermal power contributed 65.87%, hydroelectricity 20.75%, other sources of renewable energy 10.80%, and nuclear power 2.56%. India meets most of its domestic energy demand through its 106 billion tons of coal reserves. India is also rich in certain alternative sources of energy with significant future potential such as solar, wind and bio fuels (, sugarcane). India's huge thorium reserves – about 25% of world's reserves – are expected to fuel the country's ambitious nuclear energy program in the long-run. India's dwindling uranium reserves stagnated the growth of nuclear energy in the country for many years. However, the Indo-US nuclear deal has paved the way for India to import uranium from other countries.

Fields are located offshore at Mumbai High, Krishna Godavari Basin and the Cauvery Delta, and onshore mainly in the states of Assam, Gujarat and Rajasthan. India is the fourth largest consumer of oil in the world and imported \$82.1 billion worth of oil in the first three quarters of 2010, which had an adverse effect on its current account deficit. The petroleum industry in India mostly consists of public sector companies such as Oil and Natural Gas Corporation (ONGC), Hindustan Petroleum Corporation Limited (HPCL) and Indian Oil Corporation Limited (IOCL). There are some major private Indian companies in the oil sector such as Reliance Industries Limited (RIL) which operates the world's largest oil refining complex.
