

countries in order for the exchange to be equivalent to each currency's purchasing power.

The relative version of PPP is calculated as:

Purchasing Power Parity (PPP)

Where:

"S" represents exchange rate of currency 1 to currency 2

"P1" represents the cost of good "x" in currency 1

"P2" represents the cost of good "x" in currency 2

The following table is an estimate for largest 20 economies in 2030 and 2050 made by PricewaterhouseCoopers on January 2013.

Inflation
