

*The CNX Energy Index represents about 10.94% of the free float market capitalization of the stocks listed on NSE and 83.94% of the free float market capitalization of the stocks forming part of the Energy sector universe as on March 28, 2013.*

*The electricity sector in India had an installed capacity of 223.625 GW as of April 2013, the world's fifth largest. Captive power plants generate an additional 34.444 GW. Non Renewable Power Plants constitute 87.55% of the installed capacity and 12.45% of Renewable Capacity. India generated 855 BU (855 000 MU i.e. 855 TWh) electricity during 2011–12 fiscal.*

*In terms of fuel, coal-fired plants account for 57% of India's installed electricity capacity, compared to South Africa's 92%; China's 77%; and Australia's 76%. After coal, renewal hydropower accounts for 19%, renewable energy for 12% and natural gas for about 9%. The International Energy Agency estimates India will add between 600 GW to 1200 GW of additional new power generation capacity before 2050*

*Major economic and social drivers for India's push for electricity generation include India's goal to provide universal access, the need to replace current highly polluting energy sources in use in India with cleaner energy sources, a rapidly growing economy, increasing household incomes, limited domestic reserves of fossil fuels and the adverse impact on the environment of rapid development in urban and regional areas.*
