

Five Steps to Financial Wellbeing

recently, he had always earned quite a lot more than me, especially during the years when I was working part time to accommodate our young children. Different couples take different approaches to how they manage money in their relationships, but we have always shared money, through the really awful times, and now in overwhelmingly better ones. Seeing the different ways that we work and earn, the way that they complement one another and the different value that they hold has helped me to reach a more peaceful place with regard to how I earn a living. I earn more, but he has the steady salary, so when it comes to saving to buy a house, as we're currently doing, I'm able to put more cash aside for the deposit, but his very decent, steady salary is the golden key to a mortgage. So, my suggestion to you, if you are experiencing any sense of anxiety around earning 'too much' as a freelancer, particularly in comparison to a previous salary, is to converse more and compare less. Speak to the people in your life about their ways of working and earning, read articles and maybe even Twitter. Talk to enough people and you will soon see that there are hundreds upon thousands of different ways of working and earning and, more importantly, that you earning more does not directly relate to somebody else earning less or vice versa. Consider the value of your work, the way that it makes you feel, and the future that it is helping you to build. Remember that money is not a scarce resource in the world, rather that it is unfairly distributed in absolute extremes. It is, of course, entirely possible to be self-employed and barely getting by,
