

habits to your noticeboard, or setting it as the background on your phone. Making them **difficult** could mean removing payment information from your devices, or setting a phone curfew to reduce late evening scrolling and shopping. To make habits feel **unsatisfying**, Clear advocates strongly for finding an accountability partner, which is something that I've seen work well with money, as well as with other healthy habits. I have a couple of people who I speak to regularly about both my personal and business finances, and it helps me to keep a sharp focus on both the future I'm trying to build and the habits that I don't want to slip back into. We've discussed the benefits of talking about money more openly and honestly, and this is one of the huge advantages – being able to find someone who feels the same way about money as you do, who will let you know if you start to veer off course, who you can talk to if you feel old habits calling.

Exercise: Create your habit-breaking toolkit

It's a great idea now to write a list of some of the habits and behaviours that you feel are damaging your financial wellbeing – you might want to look through any notes you've already made for clues if you're struggling. Then, under each one, write down some ideas for each of the four methods of breaking them – this is the beginnings of a little toolkit for breaking the money habits that are keeping you stuck.
