

Five Steps to Financial Wellbeing

if it's very slowly at first, is motivating, and it pushes you to take further positive actions with your money. Here are a few ways that you could start saving from scratch, making things as easy as possible for yourself:

- Use an auto-saving app, which siphons off small amounts of cash every few days without you even needing to do anything.
- Set up a small standing order for on or shortly after your payday, into a simple saving account or pot.
- Use round-ups on your spending or current account.

If you can really savour the moment when you transfer your money into your savings or, if you allow yourself to feel a rush of happiness when you get an auto-saving notification, you will start to build a connection to that positive habit. Take a moment to feel grateful that you're able to put that money away for the future, and to appreciate the fact that you are prioritizing your financial wellbeing over temporary temptations and fleeting wants.

As with all of your financial rituals and habits, you should save in a way that works for you. The last thing that you want is to over-save, and find yourself needing to withdraw money from your savings mid-month, especially if it happens frequently. There's nothing wrong with being ambitious in how much you put aside, but make sure that you're not creating a situation that will undermine your new habit by forcing you to 'undo' some of your good work before you get
