

ease, however there is still a lot of misunderstanding about who can access therapy and what you can go to therapy for. Many people still believe they would not 'qualify' for therapeutic help and there is a common misconception therapy is purely for helping with mental illness recovery rather than maintaining or improving your mental wellness.

In part, this is because much of what is actually discussed inside the therapists' office still remains a secret. You might feel comfortable telling someone you're in therapy but not exactly what you and your therapist talk about. But here's the secret: there is no hierarchy of woe, in which some conditions of life are inherently more misery-making than others. Life is relative – what might be a serious problem for you may be easy for me to cope with, or vice versa. Which means it's about anything and everything you want to discuss, whether that's your mental illness, your childhood, your bank balance, your sex life, your overbearing boss, your annoying neighbour, your interfering mother-in-law: it's all allowed in the therapy room, however big or small. If it matters to you, it matters to your therapist.

Money and our relationship with it are touchy and emotional subjects for many. The more we can do to break down the shame and embarrassment many feel talking about money in general, the more it will help everyone be more honest and open about money and more likely to
