

- You feel locked in cycles of damaging financial behaviour.
- You struggle to let go of money or to spend on anything but the essentials.
- You overspend habitually but never get any satisfaction from your purchases.
- You put undue importance on status symbols or wealth signifiers.

Money and self-worth are so closely linked for most people that we sometimes struggle to see the wood for the trees, like two necklaces so completely tangled that you can no longer tell what strand belongs to which chain. Extricating them can be a lengthy and frustrating process, but sometimes, if you pull on the right knot, everything loosens, and it gets easier to untangle the rest. The more that you can understand about the relationship between your self-worth and your finances, the easier it becomes to pull them apart, and to appreciate your worth beyond its measurement in dollars or euro or pounds sterling. In this step, we'll explore the many ways in which they are linked, in order to help you to find that weak spot to attack and unravel. This isn't an instant fix – it might take time for you to start feeling the effects of the insights you uncover and the changes that you make, but it's so important for a healthy relationship with your money and yourself.
