

Actionable steps

1. Look into the retirement fund that you set up in [chapter 4](#). What companies are included in your fund?
2. Note down three things you want to positively screen for in companies, e.g. diversity, carbon neutrality.
3. Note down three things you want to negatively screen for in companies, e.g. weapons, human trafficking, animal testing.
4. Research an ethical ETF that may spark your interest and see what companies they are 'holding'.
