

Investor profile

NAME: Jenny (pseudonym)

AGE: 26

JOB: Software engineer

SALARY: £36 000

1. What does your investment portfolio look like?

£15 000 invested, 1/4 in FTSE 100, 1/4 in UK infrastructure fund, 1/4 in S&P 500 and 1/4 in NASDAQ. I also have £1000 in crypto (mostly Bitcoin, some Ethereum and Solana too).

2. How much and how often do you invest?

I invest at least £800 a month, about a third of my net salary.

3. Why do you invest?

I invest so my future will have more options. I think one day I'd like to open my own café, which will require money. In case it doesn't do well as a business, I'd also like some back-up money.

4. Any tips for new investors?

Just give it a go! Start small and safe then you can always go bigger and riskier when you understand it a bit more!
