

The good news? Now that you know these traps exist, you can avoid them.

Starting your lazy 3 portfolio

Now that we've covered the exciting opportunity that this seed represents, plus some common mistakes to avoid, let's shift gears and talk about what to do next.

Remember the lazy investor that we talked about in [chapter 10](#)? Well, this is where we put that into action.

Introducing the Lazy 3 Portfolio: a simple, no-fuss way to start investing that keeps things easy, diversified, and low maintenance.

No fancy stock-picking. No endless research. Just a straightforward way to get your money working for you in the background while you get on with your life.

Let's be honest, who has the time to read stock market news every day. For most of us, we are busy — we've got careers, family, social lives, bills, responsibilities. We try to host bridal showers for our friends and try fit in a workout every couple of weeks. The last thing most of us need is to quickly get a finance degree before we start investing or have a complicated ongoing project to manage. Added to that is all the noise — and there is *a lot* of noise when it comes to investing.

Every man and his dog seems to have an opinion on what you should do, how you should do it, what the next big thing is, when the next market crash is coming, which crypto is 'guaranteed' to explode. It's exhausting, overwhelming, and leaves many people too nervous to even take the first step. We call this analysis paralysis, and it can happen to the best of us.

That's where the Lazy 3 Portfolio comes in. It cuts through the noise. It gives you a way to get started without having to become an expert overnight. This is how I started, and how I'd recommended my family to begin.

So, let's get lazy ... in the best possible way.
