

need never face financial stress during their lifetime because of the lessons they learnt from you. Most of our financial responsibilities arise between the ages of 32 to 50, such as marriage, children, responsibility of dependent parents, etc., and the earlier we start investing, the more it helps all of us to plan for the future challenges in that age group.

Do not ever feel that it is too late to invest. Start from the day you are "awakened". My awakening came almost 12 years after I started earning money. You have to decide yours. If you have not yet started, then today is the day. Today is the first day for the rest of your life. You don't need to look backwards. Look forward and run. Looking behind can do only one thing to you – slow you down.

Pay yourself first before you pay others

A millionaire asked one of his students who was trying to understand the concepts of wealth accumulation: "If you select a basket and put ten eggs into it each morning and take out nine eggs from it each evening, what will eventually happen?"

"It will overflow in time" replied the student.

"Why?" asked the millionaire.

The student responded, "Because each day I put in one more egg than I take out."

"Do exactly as I have suggested to the egg merchant. For every ten coins you place in your purse, take out for use but nine. The purse will start to fatten at once and its increasing weight will feel good in the hand and bring satisfaction to the soul."

"Deride not what I say because of its simplicity. Truth is always simple. This was my beginning of how I built my fortune".

The above is a simplified extract from the book – *The Richest Man in Babylon*. It teaches us one of the simplest ways to make sure that we get started in the right way on our journey to financial freedom.
