

never get the market value of the specific asset you are going to liquidate. So, be realistic and jot down the least amount you are likely to receive in case you have to liquidate the asset.

Figure 7.4 below shows a sample list of possible assets (with their estimated current market value and RoI) that you might be already investing into.

Only those assets are counted that can be potentially liquidated in this life span.

Asset ID	Title	Current Market Value	Remarks	Annual RoI estimate %
1	Real Estate - 1	30,00,000	Estimated Market value of the real estate (over and above where you stay)	18%
2	Real Estate - 2	5,00,000	Estimated Market value of the real estate (over and above where you stay)	25%
3	Life Insurance Policy - 1	2,00,000	Policy maturity value (not the insured value)	5%
4	Life Insurance Policy - 2	6,00,000	Policy maturity value (not the insured value)	5%
5	Gold (Physical or ETFs)	5,00,000	Invested Amount as on date	8%
6	Other commodities	2,00,000	Invested Amount as on date	10%
7	Fixed Deposits	14,00,000	Invested Amount as on date	6%
8	Corporate Fixed Deposits	3,00,000	Invested Amount as on date	9%
9	Recurring Deposits	45,00,000	Invested Amount as on date	6%
10	Mutual Funds - Equity Based		Invested Amount as on date	
11	Mutual Funds - Debt Based / FMPs		Invested Amount as on date	
12	Stocks / Equity	15,00,000	Invested Amount as on date	25%
13	Employee Provident Fund (EPF)		Current balance as on date
