

Introduction

Why should you read this book.

All around us, the story is the same – high inflation¹ and economic chaos. It does not matter whether you have a job or are an entrepreneur. Each one of us is stuck in a mindless rat race². I was no different. I was running, not knowing where I was headed. Worse, even though I later realized that this was a mindless race, I did not seem to have a solution to this aimless and missionless competition.

Was there a need to come out of this race? Was there a way to come out of this race? What would I do with my life if I could somehow come out of it? These were some of the questions criss-crossing my mind during the first half of my 20-year-long career as an electrical engineer and then as an IT professional working for some of the best companies across the globe.

It took 10 years in these high profile jobs for me to crystallize my dreams and reach the conclusion that life has to be much more than competing by pulling others down, getting salary increments, promotions, progressions and raising a family. I was somehow able to convince myself that God did not send us to this lovely planet just for this. While earning money was as important as raising one's family, this could never be the objective of our life. I spent enough time and effort on myself to crystallize my life goals – goals that could give me "true happiness."

Whatever my goals, the fundamental question that lay in front of me was how am I going to achieve these goals if I am stuck in a race which never seems to end. Where would I get the time and money to accomplish these goals?

I was working in a job that became more and more demanding every day. Yes, I was getting a better position and better salary each year but guess
