

Once you have completed your manual or automated calculation, you are ready with your High Level Financial Freedom Plan. Now, you clearly know:

1. Where we are today (Starting point or net worth)
2. Where we need to reach for financial freedom (Size of the nest egg)
3. How much time (number of years) we would need to reach the target nest egg. (Duration)

Before we move on, it is great to also have a look at some of the Results Table (Table 2) in both your 'Nest Egg Calculator' and 'Duration Calculator' worksheets of Step 3. See how your nest egg changes from today till the freedom year (in Duration Calculator), and then from freedom year until the end of your life (in Nest Egg Calculator).

As an example, we have shown a sample snapshot of Table 2 (Results Table) of 'Duration Calculator' in Fig 7.9B below.
