

Step 4: Create a Detailed Financial Freedom Plan

Now it's time to create a detailed financial independence plan. This is a very important step in your journey to achieve financial independence. This is the plan that you will have to refer to, on a monthly basis and track/update it with the actual portfolio status.

It will be your friend through your entire journey and will push you to think of innovative ways to reach your monthly targets (in case you lag behind at any stage).

The detailed financial plan starts with using the inputs from high level financial plan that we just created in Step 3.

At our website, you will find a downloadable sheet for Step 4. Just copying the data from an appropriate location in Step 3 sheet and pasting it at the right location in Step 4 sheet can readily give you your Detailed Financial Freedom Plan.

Here is the process for obtaining Step 4 Plan from Step 3 sheets that you created in the previous step:

1. Open your final version of Step 3 Excel file that you created in the last step.
2. Go to the tab "Duration Calculator"
3. You will find two tables here. Table 1 (Duration Calculator Inputs) is what you used earlier to feed in your data. Table 2 (Duration Calculator Results) is what you will use now.
4. In Table 2 (Col F to K), copy all the rows starting the first row (Row # 5 of Step 3 file) upto your freedom year (should be already highlighted with your financial freedom year). Please look at Figure 7.10 below to understand what you need to copy.
