

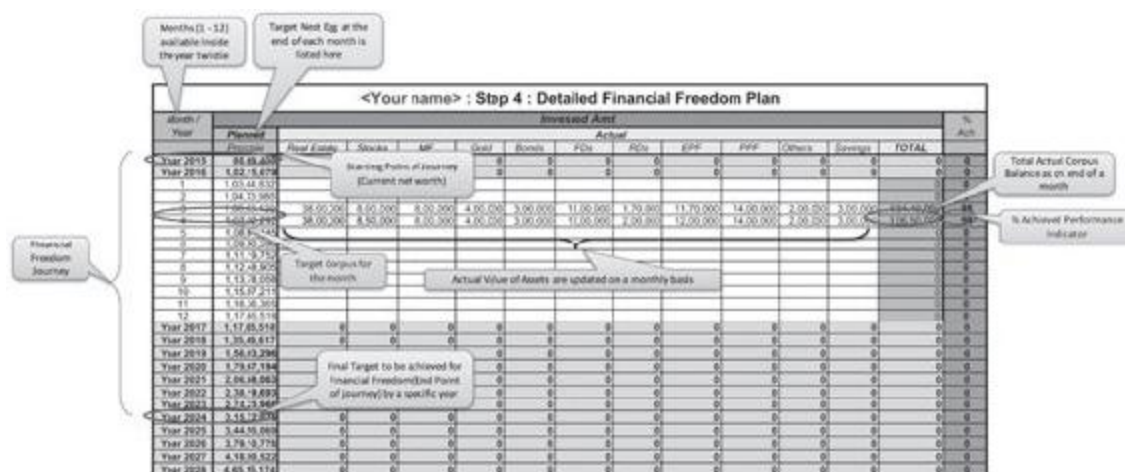

Fig 7.13 : Detailed Financial Freedom Plan - Key Elements

1. Year and month

- At the minimum, we must track our journey towards financial freedom on a monthly basis
- This column will have one row for each month of the year. Months are marked from 1 to 12 and are enclosed inside a twistie for the specific year. You will be required to track your actual nest egg each month.

2. Planned Principle

- This is the target nest egg for you at the end of a specific month. e.g. in Fig 7.13, you can see that the target nest egg amount for April 2017 is ₹10,732,292
- Note that, in most cases, your nest egg amount in this column is planned to keep growing till the end of your journey.
- The target nest egg balance for each month has been arrived after due calculation and practical feasibility based on the data in the earlier steps of planning.

3. Actual investments

- As shown in Fig 7.13, you will enter your actual balance under each of your Asset Classes (like FDs, RDs, Mutual Funds etc..) at the end of each month.
