

financial planning, based on my income and expenses, present assets⁴ and liabilities, inflation, my age, my future potential family expenses, and so many other factors. It answers many questions. How do I actually plan my own journey step by step? How do I make month on month goals? What goals are right for me? How do I document them? Once I have documented them, how can I track them month on month to make sure that my journey stays on track till I reach financial freedom? What kind of tracking mechanisms can be adopted to make sure that my freedom nest stays healthy? There is tons of information and hope for you to start working upon.

I often compare financial freedom with a nation's freedom. Why is it so important for a country to be free? Perhaps because a country wants to take certain decisions which it feels are in its best interest for its future under the given circumstances. It wants to be free to be able to take those decisions. Similarly, it is a fundamental trait of human beings that they want to be able to take their own decisions in their life and experience the results. The reader can take those decisions if he or she is out of the rat race and enjoys what is popularly known as "financial freedom". This is the reader's personal freedom, which is no less important than a nation's freedom.

The good news is that this freedom is not that difficult to achieve and the best news is that it is all in your hands. The book gives you a direction and illustrates how a common man like me has done it. The ball is in your court now!!

Go for it.....
