

What can you give to others if you are yourself stuck in a stressful, seven days a week, job or are struggling to meet your own family's daily needs? What physical health can you guarantee for yourself and your family with all the stress and physical pain caused by doing something which does not make you happy?

It reminds me of a very common instruction we hear whilst boarding an aircraft — In case of an emergency during the flight, oxygen masks will descend from above your seat, please make sure that you put on your mask before helping your children or neighbour with their mask. Why do they say this? Is it not selfish? Should children not be attended on priority? No, it is just wise. If you cannot breathe properly how will you be able to help anyone else?

It is exactly the same with accumulating wealth and getting rich. In most cases, it is a pre-requisite to helping others.

Financial freedom through wealth accumulation gives you all the freedom to do what you really want to do in life.

 So, what's the **POINT?** **You need money to use it the way that it is intended to be used.**

Do you need to invest?

Is accumulating wealth enough or do we need to invest mandatorily? Before we understand the term 'financial freedom', we must understand the term investment and the reasons we should invest at all. You have your money in the bank and the bank¹⁰ is anyway paying you a "decent" interest¹¹ besides keeping your money safe. So, do you think you really need to invest your money elsewhere?

Yes, you do.
