

Technical Concepts in Financial Independence

*The rich invest their money and spend what is left;
the poor spend their money and invest what is left.*

— **Jim Rohn**

Most people I have met during my professional career, have either never imagined what can be achieved with this financial freedom or even if they had that imagination, they never knew how to get out of the rat race in which they are stuck. Each of them had a reason to continue in that race and they all 'conveniently' felt that they were victims of their circumstances.

If you have ever had this feeling, you need not ever feel that way again. You have everything that is needed to come out of this mess. Just follow what I am about to tell you, step by step. We will start by understanding certain concepts which will form the basis for you to take fundamental investment decisions. You should read them as many times as you need and be comfortable with these concepts. If you are new to personal finance, it is not reasonable to expect that you would understand everything during the first reading.
