

Revision 2

Of all my books, this book has been, and will always be, the closest to my heart. Not only was this the first book I authored, this is also the one which has had the biggest impact on my own life. The book depicts my journey from the corporate rat race to striving for financial freedom, and then chasing my true purpose of life.

As of writing this revision, this book changes 10 new lives - every single day, and encourages more people to dream higher about themselves, their families and the world around them. There is a revolution brewing.

From the time the book first got published, I have interacted personally with thousands of freedom seekers over phone, WhatsApp or face to face, conducted tons of seminars, communicated with my readers and freedom seekers over emails, blogs and social media and learnt so much more. I interacted with readers and freedom seekers, who are in different stages of their lives, with different income levels, in different age groups, facing altogether different financial and personal challenges in life, and therefore having a different set of perspective towards money and life. I got smarter, wiser with each such interaction. I learnt, and learnt, and learnt.

And learning makes very little sense, if it is not shared. Revision 2 is a culmination of all those learnings incorporated for you. Revision 2 introduces a completely new section on Building & Balancing Your Portfolio depending on your age group. We are also launching a brand new website for 'online' tracking of your financial freedom without any excels – the first ever attempt globally to track your financial freedom online.

This revision also immensely provides new innovative money management strategies, smart tax saving tips, new investment tools, This is apart from fixing some of the known bugs and general enhancements. All this, because all of you deserve every bit of it.

For those who have interacted with me, they know me very well that my only mission in life is to elevate the world around me, and I would not
