

Financial Investment Tools

*Academic qualifications are important and so is financial education.
They're both important and schools are forgetting one of them.*
— **Robert Kiyosaki**

Having learnt some of the most fundamental concepts about money, calculation of returns and allocation of assets, it is time to start looking at some of the tools available in the market that you can utilize to actually start investing your money and start the learning process on this beautiful journey towards financial freedom.

As you go through these tools, do not forget the end objective, which is to have enough in your nest egg²⁷, so that the money can take care of itself. Once the nest egg becomes large and strong enough, you can term yourself truly "free" for that is when you can start pursuing your bigger dreams of life. Always remember that building this nest egg is just a means to achieve bigger goals and dreams in life, and not an end itself.

There are so many investment options available today across all the asset classes that it can become confusing, at times, to decide where to invest,
