↓ IF YOU DON'T QUALIFY FOR A MORTGAGE

As you know by now, lenders are really cracking down on who gets a mortgage. If you don't qualify because you have a poor credit score, I recommend that you wait a year or two. Focus on improving your score (pay your student loan and credit card bills on time for at least a year), and apply for a mortgage when it's better. One warning: Steer clear of mortgage brokers who promise to get you a loan despite your credit history. If they can do it at all, the interest will be astronomical.
