

\$1,000 per person for contributing to a 401(k), IRA, or other retirement account. This is in addition to any other tax break you get from your 401(k) or IRA. For more details, see section If You're Self-Employed in Chapter 6.

- **Alternative Home Energy Credit.** Put solar panels on your roof and you could earn a credit for 30% of the cost. So if you install a typical \$10,000 system, you could get a credit of more than \$3,000. You can also get a 30% credit for installing a small wind turbine on your property.
- **Hybrid Car Credits.** If you're a supporter of all things green or just want to reduce your high gas costs (who doesn't?), you may have taken the plunge and bought an alternative fuel vehicle, or hybrid—and you're due a tax credit for it. The dollar amount varies depending on the type of car. To find out more, check out www.fueleconomy.gov or search www.irs.gov for “hybrid cars.”

↓ **TEN TAX MOVES THAT COULD SAVE YOU MONEY**

Here are some additional ideas that might work for you:

1. **Bunch your deductions into one year.** If you don't have enough deductible expenses to make it worth your while to itemize this year or if you don't meet the minimums for certain deductions, take the standard deduction now and put off additional deductible expenditures until next year. For example, make your charitable contributions next January rather than this December.
2. **See if you can deduct your moving costs.** If you relocated to a new place for a full-time job, you may be able to deduct the cost of your move, including transportation, packing, and shipping costs. You don't have to itemize in order to get this deduction. But rules governing who gets this deduction are tricky, so read the following description slowly. The distance
