

class groups in the U.S. and many other countries.

The passing years have helped me judge the value of these books and gauge their effect upon their readers. They have helped hundreds of thousands, perhaps millions, to build lives of happiness and success. I have been interested, all this while, in finding out which of the many items of advice have turned out to be most useful and of most universal application. I have checked carefully to see which anecdotes and types of anecdotes have provided the upward turning point at which a man finds himself and *goes*.

This book represents, in part, a careful choice of items which have stood the test of time. In reading these items you will know that they in particular have something which takes hold in the mind and builds the power of the mind to will the best and find it.

Also you will find much that is new. The world changes—not in principle, but in certain aspects which bring different kinds of opportunities to the seeking man. More money-making opportunities have arisen in the United States during the past two decades than existed in all of our previous history, and still they swarm thick and fast. You will acquire a vast vision for these opportunities as you read this book.

You will find, if you have read my previous works, that this one has a new and different objective, emphasizing values which money alone cannot buy. All of my books show in many ways that there is more to life than making money. This book proves the point far more fully than I was able to prove it years ago—and shows, too, that peace of mind in itself is a mighty force in helping you make money.

I have said this book has been nearly seventy years in the planning. Quite true, but until recently I did not know it. I believe we all are guided by invisible sources of inspiration, and recently there came to me inspiration from a strange and very real source, revealing how much of my life has been spent in preparing to write these pages, urging me to uncover my typewriter and get to work.

The man who speaks to you is in his eighties. His life remains full and hearty. His possessions—of which he surely has enough—have not taken away the thrill of accomplishment. The book is the first step of accomplishment; the best of the accomplishment comes in knowing that this book will bring wealth and happiness to those who read and think.

I am ready now to write more clearly and maturely than ever was possible to me before. Join me and we will go on a fascinating journey together . . . a journey towards riches . . . a journey toward the fulfillment of your dearest dreams . . . a journey toward a Supreme Secret which gives you mastery of life itself.
